

3rd Nature Puzzle

Like a puzzle, humans and nature are the essential pieces of the 3rd Nature Puzzle, which complements the functional harmony between the square and its surroundings.

The proposal affirms the creation of an imponent green space that penetrates the urban grid, bringing nature back to the city. Therefore, Dr. Tito Fontes Square is transformed into a dynamic ecosystem, where nature is celebrated and reintegrated into the urban experience, through a sustainable and harmonious puzzle that provides living areas that interact with the built space, with people their social needs and the natural environment.
